

House Bill 6818 discriminates against those of us that live on Connecticut border towns, adding tolls to the highways will add delays to already difficult commutes and even more so will turn our side streets into commuter highways as cars will cut across the borders using neighborhood streets rather than the highways... If the negative impact on the quality of our lives isn't enough, it is time that Connecticut learned to live on a "budget". Any new taxes are an insult to the working population of this state which is losing economic ground every year. Jobs are fleeing the northeast to lower cost overseas locations and this would be one more job killing measure...

Please stop House Bill 6818!

Sincerely,  
Brian Piper
